General Virtual Medicinal Product

Parents

- Product containing only fluconazole in parenteral dose form (medicinal product form)

Product containing fluconazole 2 milligram/1 milliliter in parenteral dose form (clinical drug) ☆

SCTID: 50170351000188109

50170351000188109 | Product containing fluconazole 2 milligram/1 milliliter in parenteral dose form (clinical drug) |

en Product containing fluconazole 2 milligram/1 milliliter in parenteral dose form (clinical drug)

en Fluconazole 2 mg/mL in parenteral dose form

fr fluconazole 2 mg/mL forme parentérale

Has manufactured dose form → Parenteral dose form

Count of base of active ingredient → 1

Has active ingredient → Fluconazole

Has basis of strength substance → Fluconazole

Has concentration strength numerator value → 2

Has concentration strength numerator unit → milligram

Has concentration strength denominator value → 1

Has concentration strength denominator unit → Milliliter

Children (2)

- Product containing fluconazole 100 milligram/50 milliliter conventional release solution for infusion (clinical drug)
- Product containing precisely fluconazole 2 milligram/1 milliliter conventional release solution for infusion and/or injection (clinical drug)

Specific Virtual Medicinal Product

Parents

- Product containing only fluconazole in parenteral dose form (medicinal product form)
- Product containing fluconazole 2 milligram/1 milliliter in parenteral dose form (clinical drug)

Product containing fluconazole 100 milligram/50 milliliter conventional release solution for infusion (clinical drug) ☆

SCTID: 50170451000188100

50170451000188100 | Product containing fluconazole 100 milligram/50 milliliter conventional release solution for infusion (clinical drug) |

en Product containing fluconazole 100 milligram/50 milliliter conventional release solution for infusion (clinical drug)

en Fluconazole 100 mg/50 mL solution for infusion

fr fluconazole 100 mg/50 mL solution pour perfusion

Has manufactured dose form → Conventional release solution for infusion

Count of base of active ingredient → 1

Unit of presentation size unit → Milliliter

Unit of presentation size quantity → 50

Has active ingredient → Fluconazole

Has basis of strength substance → Fluconazole

Has concentration strength numerator value → 2

Has concentration strength numerator unit → milligram

Has concentration strength denominator value → 1

Has concentration strength denominator unit → Milliliter

General Virtual Medicinal Product

Parents

- ▶ ⋮ Product containing only abacavir and lamivudine in oral dose form (medicinal product form)

⋮ **Product containing abacavir 600 milligram and lamivudine 300 milligram in oral dose form (clinical drug)** ★ 📄

SCTID: 50170371000188102

50170371000188102 | Product containing abacavir 600 milligram and lamivudine 300 milligram in oral dose form (clinical drug) |

en Product containing abacavir 600 milligram and lamivudine 300 milligram in oral dose form (clinical drug)

en Abacavir 600 mg and lamivudine 300 mg oral

fr abacavir 600 mg et lamivudine 300 mg forme orale

Has manufactured dose form → Oral dose form

Count of base of active ingredient → 2

Has active ingredient → Lamivudine

Has basis of strength substance → Lamivudine

Has presentation strength numerator value → 300

Has presentation strength numerator unit → milligram

Has presentation strength denominator value → 1

Has presentation strength denominator unit → Unit of presentation

Has active ingredient → Abacavir

Has basis of strength substance → Abacavir

Has presentation strength numerator value → 600

Has presentation strength numerator unit → milligram

Has presentation strength denominator value → 1

Has presentation strength denominator unit → Unit of presentation

Children (1)

- ▼ ⋮ Product containing abacavir 600 milligram and lamivudine 300 milligram /1 each conventional release oral tablet (clinical drug)
 - ▶ ⋮ Product containing precisely abacavir (as abacavir hydrochloride) 600 milligram and lamivudine 300 milligram/1 each conventional release oral tablet (clinical drug)
 - ▶ ⋮ Product containing precisely abacavir (as abacavir sulfate) 600 milligram and lamivudine 300 milligram/1 each conventional release oral tablet (clinical drug)

Specific Virtual Medicinal Product

Parents

- ▶ ⋮ Product containing only abacavir and lamivudine in oral dose form (medicinal product form)
- ▲ ⋮ Product containing abacavir 600 milligram and lamivudine 300 milligram in oral dose form (clinical drug)

⋮ **Product containing abacavir 600 milligram and lamivudine 300 milligram /1 each conventional release oral tablet (clinical drug)** ★ 📄

SCTID: 50170361000188106

50170361000188106 | Product containing abacavir 600 milligram and lamivudine 300 milligram /1 each conventional release oral tablet (clinical drug) |

en Product containing abacavir 600 milligram and lamivudine 300 milligram /1 each conventional release oral tablet (clinical drug)

en Abacavir 600 mg and lamivudine 300 mg oral tablet

fr abacavir 600 mg et lamivudine 300 mg comprimé oral

Has manufactured dose form → Conventional release oral tablet

Count of base of active ingredient → 2

Has active ingredient → Lamivudine

Has basis of strength substance → Lamivudine

Has presentation strength numerator value → 300

Has presentation strength numerator unit → milligram

Has presentation strength denominator value → 1

Has presentation strength denominator unit → Unit of presentation

Has active ingredient → Abacavir

Has basis of strength substance → Abacavir

Has presentation strength numerator value → 600

Has presentation strength numerator unit → milligram

Has presentation strength denominator value → 1

Has presentation strength denominator unit → Unit of presentation

Children (2)

- ▶ ⋮ Product containing precisely abacavir (as abacavir hydrochloride) 600 milligram and lamivudine 300 milligram/1 each conventional release oral tablet (clinical drug)
- ▶ ⋮ Product containing precisely abacavir (as abacavir sulfate) 600 milligram and lamivudine 300 milligram/1 each conventional release oral tablet (clinical drug)

General Virtual Medicinal Product

Parents

- ▶ Product containing only perindopril in oral dose form (medicinal product form)

Product containing perindopril arginine (perindopril) 10 milligram in oral dose form (clinical drug)

SCTID: 50170411000188101

50170411000188101 | Product containing perindopril arginine (perindopril) 10 milligram in oral dose form (clinical drug) |

en Product containing perindopril arginine (perindopril) 10 milligram in oral dose form (clinical drug)

en Perindopril arginine 10 mg in oral dose form

fr Perindopril arginine 10 mg forme orale

Has manufactured dose form → Oral dose form

Count of base of active ingredient → 1

Has active ingredient → Perindopril

Has basis of strength substance → Perindopril arginine

Has presentation strength numerator value → 10

Has presentation strength numerator unit → milligram

Has presentation strength denominator value → 1

Has presentation strength denominator unit → Unit of presentation

Children (1)

- ▼ Product containing perindopril arginine (perindopril) 10 milligram/1 each conventional release oral tablet (clinical drug)
- Product containing precisely perindopril arginine 10 milligram/1 each conventional release oral tablet (clinical drug)

Specific Virtual Medicinal Product

Parents

- ▶ Product containing only perindopril in oral dose form (medicinal product form)
- ▲ Product containing perindopril arginine (perindopril) 10 milligram in oral dose form (clinical drug)

Product containing perindopril arginine (perindopril) 10 milligram/1 each conventional release oral tablet (clinical drug)

SCTID: 50170401000188104

50170401000188104 | Product containing perindopril arginine (perindopril) 10 milligram/1 each conventional release oral tablet (clinical drug) |

en Product containing perindopril arginine (perindopril) 10 milligram/1 each conventional release oral tablet (clinical drug)

en Product containing perindopril arginine (perindopril) 10 mg/1 each conventional release oral tablet

fr Perindopril arginine 10 mg comprimé

Has manufactured dose form → Conventional release oral tablet

Count of base of active ingredient → 1

Has active ingredient → Perindopril

Has basis of strength substance → Perindopril arginine

Has presentation strength numerator value → 10

Has presentation strength numerator unit → milligram

Has presentation strength denominator value → 1

Has presentation strength denominator unit → Unit of presentation

Children (1)

- Product containing precisely perindopril arginine 10 milligram/1 each conventional release oral tablet (clinical drug)

General Virtual Medicinal Product

Parents

- ▶ ☰ Product containing only clopidogrel in oral dose form (medicinal product form)

- ☰ **Product containing clopidogrel 75 milligram in oral dose form (clinical drug)** ★ 📄
- SCTID: 50170391000188101
- 50170391000188101 | Product containing clopidogrel 75 milligram in oral dose form (clinical drug) |
- en* Product containing clopidogrel 75 milligram in oral dose form (clinical drug)
- en* Clopidogrel 75 mg in oral dose form
- fr* Clopidogrel 75 mg, forme orale

Has manufactured dose form → Oral dose form
 Count of base of active ingredient → 1

Has active ingredient → Clopidogrel
 Has basis of strength substance → Clopidogrel
 Has presentation strength numerator value → 75
 Has presentation strength numerator unit → milligram
 Has presentation strength denominator value → 1
 Has presentation strength denominator unit → Unit of presentation

Children (1)

- ▼ ☰ Product containing clopidogrel 75 milligram/1 each conventional release oral tablet (clinical drug)

General Virtual Medicinal Product

Parents

- Product containing only tramadol in oral dose form (medicinal product form)
- Product containing tramadol hydrochloride (tramadol) 50 milligram in oral dose form (clinical drug)

Product containing tramadol hydrochloride (tramadol) 50 milligram/1 each prolonged-release oral (clinical drug)

SCTID: 50170281000188106

50170281000188106 | Product containing tramadol hydrochloride (tramadol) 50 milligram/1 each prolonged-release oral (clinical drug) |

en Product containing tramadol hydrochloride (tramadol) 50 milligram/1 each prolonged-release oral (clinical drug)

en Tramadol hydrochloride 50 mg prolonged-release oral

fr tramadol 50 mg forme orale libération prolongée

Has manufactured dose form → Prolonged-release oral

Count of base of active ingredient → 1

Has active ingredient → Tramadol

Has basis of strength substance → Tramadol hydrochloride

Has presentation strength numerator value → 50

Has presentation strength numerator unit → milligram

Has presentation strength denominator value → 1

Has presentation strength denominator unit → Unit of presentation

Children (2)

- Product containing precisely tramadol hydrochloride 50 milligram/1 each prolonged-release oral tablet (clinical drug)
- Product containing tramadol hydrochloride (tramadol) 50 milligram/1 each prolonged-release oral capsule (clinical drug)
- Product containing precisely tramadol hydrochloride 50 milligram/1 each prolonged-release oral capsule (clinical drug)

Specific Virtual Medicinal Product

Parents

- Product containing tramadol hydrochloride (tramadol) 50 milligram/1 each prolonged-release oral (clinical drug)

Product containing tramadol hydrochloride (tramadol) 50 milligram/1 each prolonged-release oral capsule (clinical drug)

SCTID: 50170301000188105

50170301000188105 | Product containing tramadol hydrochloride (tramadol) 50 milligram/1 each prolonged-release oral capsule (clinical drug) |

en Product containing tramadol hydrochloride (tramadol) 50 milligram/1 each prolonged-release oral capsule (clinical drug)

en Tramadol hydrochloride (tramadol) 50 mg prolonged-release capsule

fr tramadol 50 mg gélule à LP

Has manufactured dose form → Prolonged-release oral capsule

Count of base of active ingredient → 1

Has active ingredient → Tramadol

Has basis of strength substance → Tramadol hydrochloride

Has presentation strength numerator value → 50

Has presentation strength numerator unit → milligram

Has presentation strength denominator value → 1

Has presentation strength denominator unit → Unit of presentation

Children (1)

- Product containing precisely tramadol hydrochloride 50 milligram/1 each prolonged-release oral capsule (clinical drug)
